

NOVATAC™

Quick Reaction Mount™

Attach or remove your light to or from your weapon in just seconds.

Hybrid Material Design: Aluminum base for rugged durability and seamless fit, while the nylon head makes it extremely lightweight

Quick Reaction mounting system provides the ultimate in versatility

Shown actual size

Designed for use with any Picatinny rail mounting systems

NovaTac QRM™, Ideal for Special Forces, Snipers, SWAT Team, Law Enforcement

Seconds count when you're in critical situations, which is why the new NovaTac QRM is the most innovative and versatile weapon/flashlight mount on the market, giving the modern Special Operator or Law Enforcement SWAT officer maximum performance and flexibility.

The patent pending design allows the user to quickly remove or attach the mount to a weapon, or a flashlight to the mount in just seconds, giving Special Operators the most choices in tactical situations. This hybrid, lightweight mount accepts

the flashlight with the pocket clip still attached, allowing your pocket carry light to be your back-up light. Can be used with all NovaTac flashlight models and accepts any Picatinny compatible system.

Designed to the highest standard for military gear giving you the ultimate advantage you need to conquer the enemy.
